BRUNELLO CUCINELLI

FY 17 Results

March 7th, 2018

Brunello Cucinelli

“2017 has ended, reporting once again “particularly pleasing” results and showing a growth path that is consistent, moderate but sound - year in year out. This growth is pursued both in the physical and online world in a balanced manner, and it has resulted in our business crossing the 500 million revenues threshold, an achievement that makes us “very very satisfied”.

“The good performance in our Spring sales, the excellent sales campaign in Fall Winter 2018 - which is now coming to an end - and the very special feedback from the national and international trade press seem to indicate that yet another positive year lies ahead, featuring double digit growth in terms of both revenues and profit”.

“Our appealing development projects and the great brand protection effort online are the pillars of our daily work, a work that fascinates us and enables us to enthusiastically pursue and seek a good life”.

press release 7th March 2018

Humanist Artisans of the Web

We have always believed that the world of the web is fascinating and in part still to be discovered

Our desire is continuously directed towards how

- **to humanize** our relationship with the internet
- to avoid it taking over our minds

Particularly pleased with:

- results obtained since the opening of our **online boutique**
- launch of our **new corporate website**

Even more pleased with **the image** which we hope we have succeeded in:

- transmitting with the places where we live
- respect for human being, dignity and the beauty of our land

Always aware that **protection of the brand** is both a need and a wish

For us this also means giving due attention to:

- the **value of the wait**
- the **pleasure of waiting** for what you want

Gracious approach with the customer as we propose ourselves as

- friendly advisors
- never pushing a purchase

Revenues Highlights

Italy

Market of high strategic value, an extremely important showcase for the brand's image and a "thermometer" of the appreciation of the collections

The opening of the Montenapoleone boutique in Milan (Jan. 2017) had a very positive effect on the allure of the brand, supporting the growth

North America

The sales trend was solid in all distribution channels, both monobrand and multibrand, with the value of the garments always enhanced by the detailed work carried out by our "visual merchandising" teams

Fundamental importance are the activities relating to the "trunk shows", sales moments when customers have the opportunity of getting to know the collections both as a whole and in detail

Greater China

Protect the brand's exclusivity and allure: limited distribution can ensure its appeal, protecting it and maintaining the exclusivity sought after by our end customers

Positive contribution through our presence in exclusive multibrand boutiques, capable of attracting a local clientele

Rest of Europe

Uniform revenues increase across all areas and in all channels, supported by top-end tourists and local customers

Very positive results of sales in both the monobrand and multibrand channels

Rest of the World

Solid results in all geographical areas, supported by an increase in the demand from local customers attracted by our brand

Exclusivity of our presence in all the markets: especially satisfied with the brand's image

Outlook

2017 ended with very positive results, but above all we would like to highlight the very favorable moment for the brand: sustainable growth, craftsmanship, manual skill, creativity and exclusivity continue to be the fundamental pillars of our industry

The sell-outs for the 2018 spring/summer collection are providing us with especially positive results; following the comments arriving from buyers, who had already called the offer “modern and of good taste” during the “sales campaign”, end customers – the authentic “judges” – have also shown their appreciation for the collection. The Fall Winter 2018 sales campaign is ending with very important results and with appreciation from both customers and highly specialized journalists. All this makes us imagine a year still very beautiful and allows us to work in all serenity, essential condition to be very creative

It is with pleasure that we welcome the significant interest being shown by some of the world’s leading universities and think-tanks to become acquainted with the “humanistic” way in which Brunello Cucinelli and the business he has created think and to examine this in further detail; we believe that this interest and the sharing of the values that underlie the “humanistic company” are held in common by our end customer, making growth prospects solid and sustainable also for 2018

Representative of the way in which we have always done business and will continue to do so was the decision taken by the prestigious Kiel Institute for the World Economy to award the Global Economy Prize to Brunello Cucinelli “for perfectly embodying the tradition of the Honourable Merchant”. Equally representative was the invitation given to him to discuss “gracious technology” at the Dreamforce Conference held in San Francisco in November 2017 in front of a vast audience of people who believe themselves to be “humanity’s great innovators and geniuses”

In 2018 and the following years we will continue to run our business with the same values, pursuing healthy objectives for growth, revenues and profits and attempting to be the “guardians of the Created” and to attend to a small part of the world. The attention we always give to foreign exchange risk hedging will additionally enable us to maintain the healthy margin levels, which represent our objective, also in the presence of the volatility in exchange rates that we are seeing

We continue our commitment to maintaining high levels of capital expenditure to protect the prestige of our brand and its exclusiveness in both the physical and digital channels

We are perfectly aware that our positioning at the top end of the luxury sector calls for a precise willingness to maintain increasingly modern selling spaces and showrooms, locations in the most important luxury streets, visual merchandising at the highest level and also an exclusive presence in the digital world, keeping our offer based on excellent quality and craftsmanship, supported by increasing up-to-date production equipment and the use of highly specialized artisanal laboratories that grow with the business

As we did in 2017, in 2018 we will continue with our virtuous process of cash generation, capable of absorbing the significant capital investments we expect to make and the additional increase in dividends and in pay-out, with the wish to share our profits with all of our shareholders, who have always believed in this Humanistic Business project

Consistent with these targets we expect to have a close-to-zero net financial position at the end of 2018, with a further improving next year

Decrease in "Trade Payables" related different approach to the declarations of intent which gives rise to VAT exemption for suppliers gives rise to a lower amount receivable from Tax Authorities and a corresponding decrease in trade payables. The lower amount in payables arising from investing activities is due to higher capital expenditure related to works performed on buildings near the closing of the previous year.

The change in "Other net liabilities" is due to the reporting at fair value of derivatives underwritten with the only purpose of hedging the exchange risk on commercial transactions in foreign currency. These derivatives are accounted following the "cash flow hedge" rules, which provide for the fair value to be booked as an asset or liability item on the Balance Sheet (Asset or Liabilities for current financial instruments), with a corresponding balancing reserve in Shareholders' equity to reflect the effective component of the change in fair value of derivatives, which will be reversed through revenues in the income statement at the point when the transaction being hedged is recognised for accounting purposes.
